[Active Directory With Dcdiag](#)

The screenshot shows the Server Manager console in Windows Server 2012 R2. The 'All Servers' view is selected in the left-hand navigation pane. A context menu is open over the 'Active Directory Module for Windows PowerShell' section, listing various management tasks. The 'Dcdiag.exe' task is highlighted. The main console area displays a table of server events and a list of server names and IDs.

Server Name	IPV4	Last Update	Windows Activation
DC1	172.	11/7/2014 12:52:00 PM	00252-10000-00000-AA228 (Activated)
